

## China RoHS

In People's Republic of China the law SJ/T 11363-2006 (known as China RoHS) came into effect on 1st March 2007. In Europe the RoHS directive are effective for more than 10 years. In an exceptional rule certain environmentally hazardous substances are accepted within a defined limit.

Since 1st July 2016 the new updated version China RoHS 2 is valid which now includes explicitly more electronic and electrical products. In consequence an obligation for declaration of all regulated substance became effective.

Therefore it is mandatory to declare the RoHS regulated substances for deliveries to China from 1st July 2016 on. As Huba Control does not know the end usage of the products in any case all deliveries will be labelled according to the directives.

## Implementation of the China RoHS directive at Huba Control AG

Products which do not contain substances listed in the RoHS exception list will be labelled with the symbol below on the product and/or packaging.

For Products which contain substances listed in the RoHS exception list these substances have to be declared. Huba Control will therefore include a list of the concerned substances from 1st July 2016 on. According to the directives the environment friendly use has to be identified. Huba Control will declare all deliveries with a life span of 30 years.

In order to guarantee proper customs handling Huba Control AG will implement the above mentioned modification from production date 1st July 2016 on.
